Jiuquan Satellite Launch Center **(JSLC)** | 酒泉

Чжу Ханьцин

или просто **Лилия**

ФКИ – РИТ (м108)

China’s the oldest, the most successful launch site – and the only one that has sent Chinese astronauts into space.

Area:
2800 km^2

Location:
Gobi Desert, Northwestern China

Climate → Window:

Desert climate with ~300 operational launch days per year

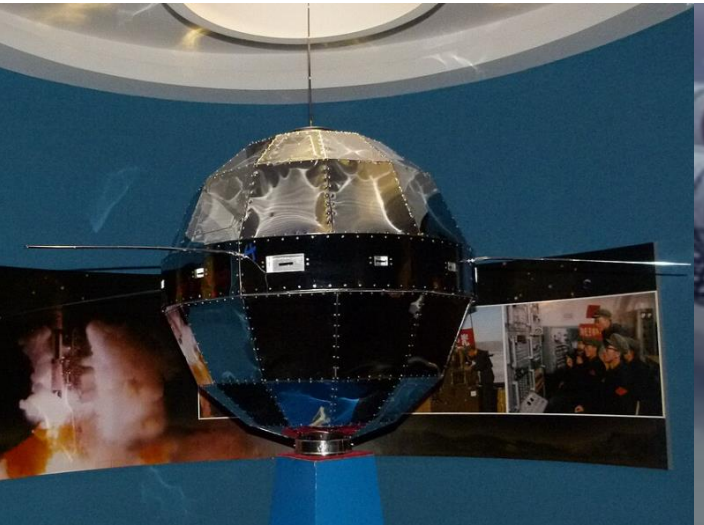

Solar power plants in the Chinese desert

Why It Is the Oldest (and Important)

Founded in **1958** (originally a missile test site)

1960: First Chinese-built surface-to-surface missile (*Dongfeng-1*)
1964 & 1966: Site of China's first atomic bomb test & missile-nuclear weapon test
1970: First artificial satellite launched (*Dongfanghong-1*)
1980: First intercontinental ballistic missile / heavy-lift launch test

So, also know as **"Dongfeng Space City"**

Why It Is the Most Successful

Manned Spaceflight

Shenzhou-1 – **1999** -
Shenzhou-5 – **2003** -
Shenzhou-7 – **2008** -
Tiangong-1 – **2011** -

Tiangong-2 – **2016** -

Scientific Achievements & Data

- **1987** - First commercial launch services for international clients

- **2015** - *DAMPE ("Wukong")* — First dark matter particle detection satellite

- **2016** - *QUESS ("Micius")* — World's first quantum science satellite

- **2018** - 100th orbital launch milestone
- **2023** - 200th orbital launch milestone

Why It Is the Most Successful

Success rate: **96.15%**
2025: **10.46%** of global launches.

Human Spaceflight:
30 astronaut person-times sent to space; 25 different astronauts.
From “Shenzhou-1” to “Shenzhou-23”, crewed launch **success: 100%**.
Project “Lecture from the space”

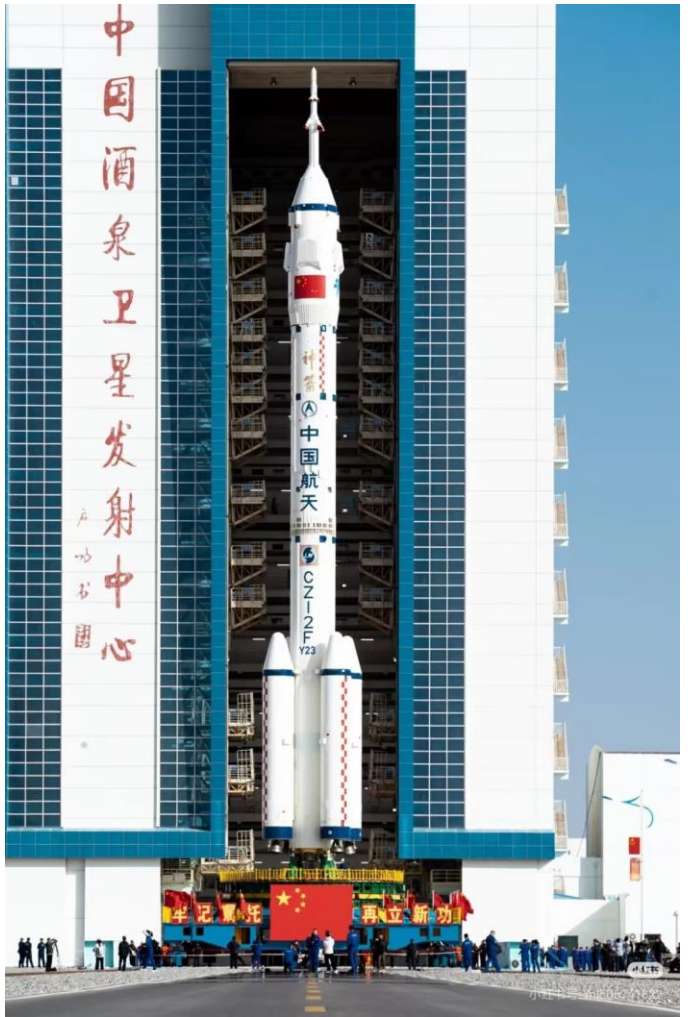

From Desert to Oasis

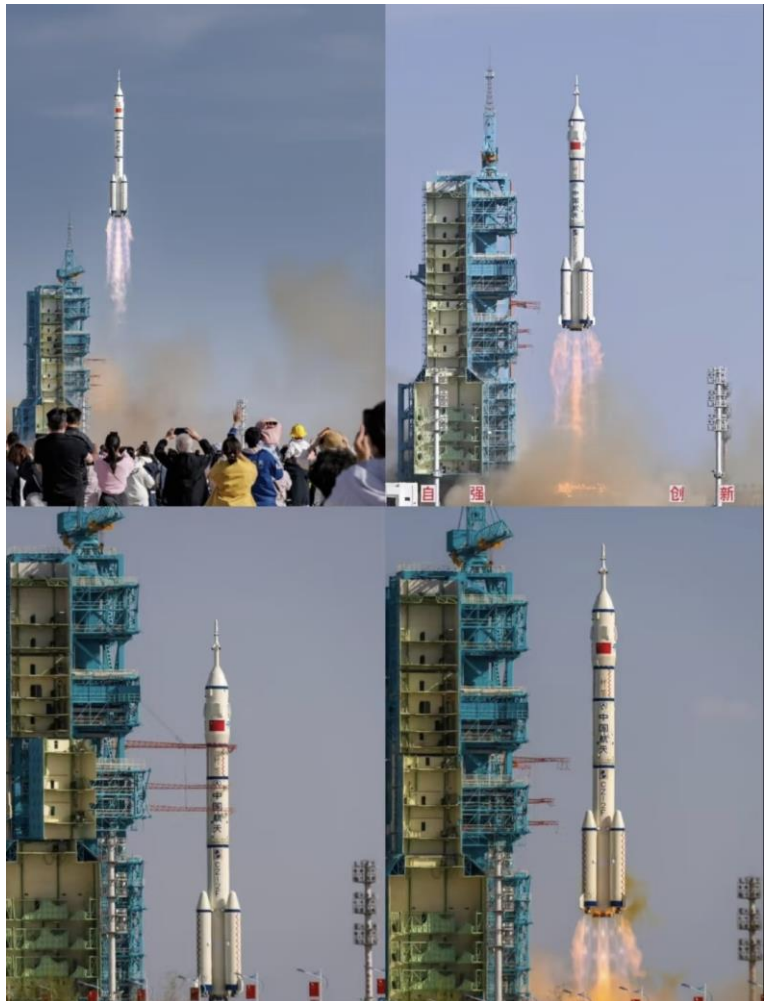

Evolved from a harsh, remote outpost into a modern space city.
Nearly 70 years of **continuous development** and **greening efforts**.

Space Tourism

Open to domestic tourists with conditional access since **1997**
Public areas accessible **free of charge** upon prior reservation and approval

Changzheng-6
Thank you for attention)
Qingdao (city of China)
